

# COLI-CLEANER

## Advantages

**- in comparison to the wet cleaning process, on CKW or water basis -**

**Integration into the manufacturing process**

**Constant high cleaning quality level by continuous exhaustion of the impurities**

**Without the use of additional cleaning materials**

- **no use of cleaning media (water or surface active agents)**
- **no preparation, no disposal**
- **no further preservation due to defined oil film adhesion remaining on machined component**
- **direct return of the cooling medium into the production process**

**Fractional cost for energy**

- **no heat-up of the working medium**
- **no drying process of machined component**

# COLI-CLEANER

## Advantages

- in comparison with past dry cleaning procedures -  
(suction/blow process)

**Short cycle times**

**Optimized cleaning result**

**Small cost for energy**

- **dedicated cleaning effort by part accommodation**
- **no compressed air**

**Recuperation of the cooling lubricants etc.**

**No development of aerosols**

**Clean work place**
